EDUCATION

Amity University

Bachelor of Technology in Information Technology

Noida, Uttar Pradesh

2023 – 2027

OBJECTIVE

B.Tech Information Technology student seeking an internship in Python automation or software testing, with interest in building test scripts, improving software reliability, and learning industry testing tools.

PROJECTS

Smart AI Task Scheduler | *React, Flask, Python, PostgreSQL, Groq API*

Jul 2025 – Aug 2025

- Built a productivity web app that helps users organize and prioritize tasks using AI-generated suggestions
- Developed backend logic for deadlines, categories, and task prioritization
- Integrated an AI API to generate schedule recommendations
- Created a dashboard to track productivity and task completion trends
- Worked on debugging, testing features, and improving application flow
- Performed manual testing of core features and fixed logic errors to improve task flow

MindfulYou - Mental Health Web App | *Flask, Python, PostgreSQL, AI API Integration*

May 2025 – Present

- Developed a web application featuring an AI chatbot, mood tracking, and journaling tools
- Implemented user authentication and database storage for user records
- Integrated AI-based conversational responses for mental wellness support
- Focused on improving usability, reliability, and backend logic

EduSphere - For Deaf and Mute Students | *Python, PyQt6, PostgreSQL, OpenCV*

Feb 2025 – Mar 2025

- Built a system that captures hand gestures using a webcam and converts them into English text
- Used computer vision libraries to process real-time gesture input
- Stored user interaction data in a database for tracking and improvements
- Designed a simple interface to support accessibility and communication

TECHNICAL SKILLS

Programming: Python, JavaScript, C, C++, Java

Web: HTML, CSS, React (Basic), Flask (Basic), REST APIs

Databases: MySQL, PostgreSQL, SQLite

Tools: Git/GitHub, VS Code, Jupyter Notebook, OpenCV

Concepts: Software Testing Basics, Debugging, Problem Solving
